

## TO DO LIST

### Task - 3

## To Do List Website

The purpose of the to-do list project is to provide users with a simple and efficient tool for managing tasks and organizing their daily

The project will include features such as task creation, deletion, and modification, as well as categorization and prioritization of tasks.

## Description:

- 1.Task Entries:** Each task is written as a concise entry on the list, making it easy to understand and prioritize.
  - 2.Prioritization:** Tasks are often organized based on their importance or urgency, allowing users to focus on what needs immediate attention.
  - 3.Deadlines:** Some to-do lists include deadlines or due dates for tasks to provide a sense of urgency and help with time management.
  - 4.Checkboxes or Markers:** Users can mark completed tasks with checkboxes, strikethroughs, or other indicators to visually track progress.
  - 5.Categories or Tags:** To-do lists may include categories or tags to help group similar tasks together, making it easier to manage related activities.
  - 6.Notes or Descriptions:** Additional details or notes about each task may be included to provide context or instructions.
  - 7.Flexibility:** To-do lists can be adapted to various formats, such as paper lists, digital apps, or software tools, catering to different preferences and lifestyles.
- 

## Stepwise Description:

### **1.List Creation:**

1.Begin by creating a comprehensive list of all the tasks you need to accomplish. Write down everything that comes to mind, ensuring nothing is overlooked.

### **2.Prioritization:**

1.Evaluate the importance and urgency of each task. Prioritize them based on deadlines, importance, or any other relevant criteria.

### **3.Break Down Tasks:**

1.If some tasks seem overwhelming, break them down into smaller, more manageable sub-tasks. This makes it easier to approach and complete them.

### **4.Use a Clear Format:**

1.Choose a format that suits your preferences. Whether it's a physical notebook, a digital app, or a software tool, make sure the format is user-friendly and accessible.

### **5.Include Deadlines:**

1.Assign realistic deadlines to tasks. This adds a sense of urgency and helps you manage your time effectively.

## Task Summary

Create an to do list app in React using `create-react-app`. Develop components for the header , add , delete , edit integrating APIs in `api.js` for list your task. The main container, `App.js`, combines these components for a seamless user interface. Evaluate key metrics including performance, user experience, error handling, security, scalability, and accessibility. Launch the application with `npm start` and customize components to meet specific project requirements. This succinct approach outlines the core steps for establishing a functional and customizable to do list application in React.
